wenjiequ@hust.edu.cn

EDUCATION

Huazhong University of Science and Technology, Wuhan, China
B.E. Automation, Honor Class

2019.9-2023.6

- **GPA: 3.92/4.0**

RESEARCH INTERESTS

Machine Learning for Computer Security, Trustworthy Machine Learning

EXPERIENCE

AI Binary Analysis June 2021-January 2022
Research Intern, Network & Information Security Lab, Tsinghua University Beijing, China
Under the supervision of Professor Chao Zhang.

Designed a novel method for AI-based semantic similar function retrieval, which overcomes the robustness weaknesses of previous control flow graph-based works.

Participated in the design of a novel method for generating malware adversarial examples against static machine learning malware classifiers. Work submitted to IJCAI 2022.

Provably Robust Machine Learning and Machine Learning Privacy January 2021-January 2022
Research Intern, Neil Gong's Research Group, Duke University Durham, USA(remote)
Under the supervision of Professor Neil Gong.

Designed a novel method to provide a robustness guarantee for contrastive learning encoder service, and a method to train a provably robust encoder, work submitted to Usenix Security 2022.

Participated in the development of a novel method for performing membership inference for contrastive learning, work accepted by CCS 2021.

Participated in the development of a novel method for providing robustness guarantee for multi-label classification, work submitted to CVPR 2022.

Adversarial Machine Learning on Computer Vision July 2020-December 2020
Research Intern, School of Cyber Science and Engineering, Huazhong University of S&T Wuhan, China
Under the supervision of Dr.Binghui Wang and Professor Pan Zhou
Designed a novel method to leverage certified radius to perform an attack to semantic segmentation problem, work submitted to S&P 2021.

PUBLICATIONS

- **EncoderMI: Membership Inference against Contrastive Learning**
Hongbin Liu*, Jinyuan Jia*, **Wenjie Qu**, Neil Gong
ACM Conference on Computer and Communications Security (CCS) 2021,

- **REaaS: Robust Encoder as a Service in Contrastive Learning**
Wenjie Qu, Jinyuan Jia, Neil Gong
Submitted to Usenix Security 2022
- **MultiGuard: Provably Robust Multi-label Classification against Adversarial Examples**
Jinyuan Jia*, Wenjie Qu*, Neil Gong
Submitted to CVPR 2022
- **ASML: Against Static Machine Learning Based Malware Detectors**
Jialai Wang, Han Qiu, Wenjie Qu, Chao Zhang, Yi Rong, Qi Li
Submitted to IJCAI 2022

PATENT

Certified radius guided adversarial attack, and robust training method (CN 113052314 B)
Pan Zhou, Qiming Wu, Wenjie Qu, Yulai Xie, Ruixuan Li

HONORS & AWARDS

- Autodriving CTF, DEFCON 29, 4th place 2021
- **National Scholarship (the highest honor for undergraduates in China)** 2020
- **Outstanding Graduate(top 1%)** 2020
- Merit Student (1/30) 2020

Programming Competitions

- Bronze Medal, Asia-Pacific Informatics Olympiad 2018
- Bronze Medal, National Olympiad in Informatics Winter Camp 2018
- First Prize, National Olympiad in Informatics in Provinces 2017
